Work Experience

Kyivstar

Front-End Engineer

Big Data Products and Services Implementation Department

08/2021 - now

- Working on development of GeoPortal, Heatmaps and Client Profile web apps which help to better know clients' target audience, to evaluate the attractiveness of the location among them, optimize marketing strategy and sell more, show where it's better to open a retail outlet, expand the delivery area or launch a new transport route. Web apps developed with Power BI embedded and Mapbox integrated.
- Price monitoring portal for a pharmacy chain that combines a site parser and web app displaying the results of the client's data with the obtained results in the form of defined dashboards\graphics\elements on the map.
  I was responsible for writing a website with visualizations (dynamic tables and graphics depending on chosen filters), exporting results to excel by button click, embedding a map displaying client`s and competitors` trade points, implementing lasso element to highlight necessary area for further analysis of the results.

- Using HTML, CSS, Javascript, dropzone.js, sheet.js, chart.js, google maps Javascript APIs, Power BI Javascript APIs.
- Working with Atlassian suite of tools such as Jira and Confluence.

Websites on the task of Hillel IT School and personal projects

05/2021 - 08/2021

- My CV website, adaptive landing pages, bootstrap landing
